- 1) Alcohol testing will be performed by using Evidential Breath Testing (hereafter EBT) devices approved by the NHTSA. The test will be conducted by a Breath Alcohol Technician (hereafter BAT). Two (2) breath tests will be required to determine if a person has a prohibited alcohol concentration. If the first test result is less than .08 the test will be considered negative. If the test shows an alcohol concentration of .08 or greater, a second confirmation test will be conducted. The second test result will determine what action if any need be taken.
- 2) In order to ensure that an EBT is working properly, the BAT will run an air blank test which shows a reading of zero before a test is performed. A fifteen (15) minute waiting period is required between the screening and confirmation test. The BAT will run an air blank test which shows a reading of zero before the confirmation test is performed.
- 3) Drug testing will be performed by providing a urine sample at a site to be determined by both parties and meets the requirements of the DOT 49CFR part 40 and The Department of Health and Human Services.
- 4) Specimen collection procedures require security for the collection site, chain of custody documentation, use of authorized personnel, privacy during collection, integrity and identity of the specimen, and transportation to the laboratory. Only those laboratories certified by the federal government, and the Department of Health and Human Services and that have these procedures in place will be used.
- 5) All personnel subject to testing shall present proper identification upon appearing at the laboratory.
- 6) Once the urine specimen is collected, it will be forwarded to the laboratory. The accuracy of the test shall be drug specific. The initial test shall employ a methodology different from the second test. The initial screening shall use the EMIT Immunoassay Process. If the test is negative no further test will be required. If the result is positive, a second confirmation test will be conducted. The confirmation test is performed using a Gas Chromatology/Mass Spectrometry (GC/MS) technique.
- 7) The testing facility will be continuously bound to make provisions to properly preserve, store and secure an aliquot of the original urine specimen, to be reserved and made available for the purpose of an independent confirmation. This independent confirmation will be authorized by the employee, using the lab of his/her discretion. Any employee requesting a testing of the split sample, must do so within seventy (72) hours, provided the employee is properly notified by the

MRO. Also the Laboratory will make available to the employee, for his/her inspection, all records of the primary and secondary confirmation testing done by the lab in the urine sample provided by the employee.

- 8) Only confirmed positive results are reported. The Human Resource Director shall be notified immediately following a positive test result. The Human Resource Director is the only person to be notified of a positive test.
- 9) The laboratory must continue the uninterrupted chain-of-custody procedure from receipt of the specimen and maintain internal chain-of-custody procedures which establish fundamental accountability and reliability of testing from a legal viewpoint. The chain-of-custody procedure must be stringent and confidential in all phases of the process:
 - Handling of the specimen
 - Testing the specimen
 - Storing of the specimen
 - Reporting of the test results
- 10) The Borough shall assure that the existing laboratory will be subject to appropriate external auditing procedures to evaluate quality assurance, evaluation of testing procedures and overall performance.
